At Alpha and Bravo and Charlie
I'm getting the hang of the parley
At India Foxtrot
I'm right on the spot
But for Golf I'm always quite snarly!

Speech-Recognition Software and the Spelling Alphabet

Most people have heard "Alpha Bravo Charlie" and know it comes from a spelling alphabet. The ICAO (International Civil Aviation Organization) spelling alphabet, also known as the NATO phonetic alphabet or international radiotelephony spelling alphabet, is the most popular spelling alphabet. It is frequently referred to as "the phonetic alphabet" but spelling alphabets are different from phonetic transcription systems like the International Phonetic Alphabet.

The ICAO Spelling Alphabet is very useful when using your speech-recognition software "spell it" feature. The program does not always understand your letter pronunciation but will react correctly to the phonetic alphabet very easily. You can input a word it fails to recognise quickly. Suppose you say "antic" and it responds with "frantic" or "ranting". Instruct it to "spell it" and then say quickly: Alpha November India Tango Charlie. It never fails to get what you mean.
